Nettem Praneetha

(+91) 9515398246 | pranithanettem624@gmail.com | LinkedIn: praneetha-nettem-18351525a

Education

Velagapudi Ramakrishna Siddhartha Engineering College, Vijayawada **2022 – 2026**
B.Tech in Information Technology, CGPA – 8.52

Sri Gayathri Junior College, Vijayawada **2020 – 2022**
Intermediate, Percentage – 88.2

Sri Chaitanya High School, Jaggaiahpet **2020**
Class X SSC, Percentage – 98.1

Skills

Programming Languages :	Python,HTML, CSS
Frameworks/Libraries:	ReactJS,Next.js,Express.JS
Databases :	MySQL,Firebase
Tools/Platforms:	Vscode,Git
CS Fundamentals :	OOPS,Database Management System
Soft Skills :	Problem Solving,Time Management,Team Collaboration

Experience

Eisystems Services Intern
Training on Machine Learning with Python

– Developed a machine learning model to predict the likelihood of heart disease using clinical patient data with preprocessing, training, and evaluation techniques.
– **Tech Used:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Research Paper
Real-Time Fire Detection and Irrigation Management System using IoT and Image Processing (Published) 2025

– Authored research paper, ”Real-Time Fire Detection and Irrigation Management System using IoT and Image Processing,” presented at 19th INDIACom - 2025 (IEEE Conference ID: 66777)

Projects

YOLOv8 and ESP32-Powered System for Agricultural Fire Prevention (2024)

– Developed an integrated IoT and computer vision-based agricultural wildfire detection system using ESP32 environmental sensors and a custom-trained YOLOv8 model, achieving 87.5% accuracy
– Implemented an automated sprinkler response and real-time monitoring through a Firebase-connected mobile application for smart irrigation and rapid fire alerts.
– **Tech Used:** Python, YOLOv8, ESP32, IoT Sensors, Firebase, Mobile App Development.

Soil Fertility Mapping and Crop Recommendation System using GIS and Remote Sensing (2026)

– Developed and compared two integrated frameworks (IDW–XGBoost and Kriging–TabNet) for soil fertility mapping and crop recommendation in Guntur district.
– Generated GIS-based spatial fertility maps using soil nutrients (N, P, K, pH, OC, EC) and climatic parameters for precision agriculture.

– Achieved 99.09% accuracy using the TabNet deep learning model for location-specific crop prediction.
– **Tech Used:** Python, GIS, Remote Sensing, XGBoost, TabNet, Kriging, IDW, Scikit-learn, Google Earth Engine.

Co-curricular Activities

- Member of CSI Student Chapter, contributing to technical and cultural initiatives.
- Organized and coordinated the technical and cultural event "Splash" at college, guiding juniors and managing execution.
- Served as Event Coordinator, leading student teams and ensuring smooth conduct of the program.

Certifications

- AWS Certified Cloud Practitioner
- DBMS and MySQL Fundamentals Certification by Udemy
