

Nettem Praneetha

Konakanchi, NTR District, Andhra Pradesh, 521178

(+91) 9515398246 | pranithanettem624@gmail.com | LinkedIn: praneetha-nettem-18351525a

Education

Velagapudi Ramakrishna Siddhartha Engineering College, Vijayawada 2022 – 2026

B.Tech in Information Technology, CGPA – 8.52

Sri Gayathri Junior College, Vijayawada 2020 – 2022

Intermediate, Percentage – 88.2

Sri Chaitanya High School, Jaggaiahpet 2020

Class X SSC, Percentage – 98.1

Skills

Programming Languages :	Python, HTML
Databases :	MySQL
Technologies:	Machine Learning, Image Processing
CS Fundamentals :	OOPS, Operating System, Database Management System
Soft Skills :	Problem Solving, Time Management, Team Collaboration
Tools :	Git, GitHub, VS Code, Word, Excel

Experience

Eisystems Services Intern

Training on Machine Learning with Python

- Built a Heart Disease Prediction Model using Python (Pandas, NumPy, Scikit-learn) with data preprocessing, training, and evaluation.
- Applied ML algorithms and data visualization (Matplotlib, Seaborn) to improve healthcare analytics and prediction accuracy.

Research Paper

Real-Time Fire Detection and Irrigation Management System using IoT and Image Processing (Published)

- Published in Proceedings of the 12th International Conference on Computing for Sustainable Global Development (INDIACom-2025), BVICAM, New Delhi.

Projects

Early Fire Detection and Irrigation Management System using IoT and Image Processing

- Designed an IoT-based system integrating fire sensors, soil moisture sensors, and ESP32 for automated irrigation and fire detection.
- Implemented real-time monitoring and alerts using Firebase and a mobile app dashboard for farmers.
- Applied image processing (YOLOv9, OpenCV) to enhance fire detection accuracy and improve farm safety.

Soil Fertility Mapping and Crop Recommendation System using GIS and Remote Sensing

- Developed GIS-based soil fertility analysis and crop recommendation system for Guntur and Krishna districts.
- Integrated soil nutrient datasets with geospatial data for fertility mapping.
- Recommended crops based on soil health, climate, and spatial analysis.

Certifications

- AWS Certified Cloud Practitioner – Amazon Web Services (2025)
- Programming Essentials in C++ (Cisco, Feb 2024)
- Java Programming Fundamentals (edX, May 2024)
- DBMS and MySQL (Udemy, Apr 2024)
- The Joy of Computing using Python (NPTEL, Jan–Apr 2024)

Co-curricular Activities

- Member of CSI Student Chapter, contributing to technical and cultural initiatives.
- Organized and coordinated the technical and cultural event “Splash” at college, guiding juniors and managing execution.
- Served as Event Coordinator, leading student teams and ensuring smooth conduct of the program.
